

4.0 Patterns and Sequences (Final Review)

Mathematics

Big question: What is a subset?

Think silently → pair talk → share one idea

Today's mission

Goal: I can apply all Term 1 math ideas (Sets, Whole Numbers...

1

You will use: Setting Up Our Math Market, Mapping the Market Data

2

Success: explain, try, and answer in your own words.

3

Write one clear response.

4

Write one clear response.

Starter: think first

Think: What is a subset?

1

Pair: compare your first answer with a partner.

2

Share: connect your answer to Setting Up Our Math Market.

3

Write one clear response.

4

Write one clear response.

Setting Up Our Math Market

Key idea: Concrete Stage: Organizing market items into sets and s...

1

Use stones to represent customers.

2

Group local items into Sets.

3

Identify subsets within the market.

4

Write one clear response.

Mapping the Market Data

Watch the example.

1

Draw a Venn diagram of the inventory.

2

Create a price sequence for items.

3

Identify the rule of the sequence.

4

Write one clear response.

Try it together

How many items are in our Universal Set?

1

Can an item belong to two sets at once?

2

Where do we put items that are both cheap and useful?

3

Agree on one answer before writing.

4

Write one clear response.

Activity challenge

Group task:

1

Students work in groups of five to sort physical objects (stones...

2

Students draw Venn diagrams on paper to represent their sorted se...

3

Individual learners solve multi-digit multiplication and addition...

4

Write one clear response.

Exit ticket

Answer: How does math help a market seller in Uganda?

1

Use one complete sentence.

2

Hand in or read your answer aloud.

3

Write one clear response.

4

Write one clear response.
