

The Human Body: Muscular-Skeletal System

Integrated Science

Big question: What do you feel when you touch your shin?

Think silently first. Then be ready to explain one idea.

Today's mission

Goal: I can identify and name the main components of the human muscular-skeletal

1

system (bones, muscles, and joints).

2

You will use: Why Do We Have a Shape?, Exploring the Skeleton

3

Success: explain, try, and answer in your own words.

Starter: think first

Think: What do you feel when you touch your shin?

1

Pair: compare your first answer with a partner.

2

Share: connect your answer to Why Do We Have a Shape?.

Why Do We Have a Shape?

Key idea: Prior knowledge activation: Discussing why the body has a firm shape and

1

how it moves.

2

The body has a firm framework.

3

This framework allows us to stand and move.

4

Without it, we would be like a heap of cloth.

Exploring the Skeleton

Model the example step by step.

1

THE SKELETON

2

A framework of bones in the body.

Try it together

Why can't a piece of cloth stand up on its own?

1

What is the name of the bone protecting the brain?

2

Where are the longest bones found in the skeleton?

3

Agree on one answer before writing.

Activity challenge

Group task:

1 Students touch various parts of their bodies (head, arm, ribs) to identify hard and

2 soft parts through self-exploration for 5 minutes.

3 In groups of five, learners observe the skeleton wall chart and point out the skull,

4 ribs, and limb bones.

5 Students write the definitions of bones, muscles, and joints in

Exit ticket

Answer: Is the heart part of the muscular-skeletal system?

1

Use one complete sentence.

2

Hand in or read your answer aloud.
