

3.4 Energy Resources in the Environment

Integrated Science

Big question: Which experiment did you find most challenging?

Think silently → pair talk → share one idea

Today's mission

Goal: Recalls and identify key experiments conducted from Ter...

1

You will use: Looking Back at Our Experiments, How to Write a Sci...

2

Success: explain, try, and answer in your own words.

3

Write one clear response.

4

Write one clear response.

Starter: think first

Think: Which experiment did you find most challenging?

1

Pair: compare your first answer with a partner.

2

Share: connect your answer to Looking Back at Our Experiments.

3

Write one clear response.

4

Write one clear response.

Looking Back at Our Experiments

Key idea: Prior knowledge activation regarding Term 1 Science pra...

1

Reviewing the Muscular-Skeletal model.

2

Recalling the Electricity and Magnetism circuit.

3

Remembering the Energy Resources (biogas/solar) project.

4

Write one clear response.

How to Write a Science Report

Watch the example.

1

Title and Aim (What and Why).

2

Apparatus/Materials (The tools).

3

Procedure (The steps).

4

Write one clear response.

Try it together

What materials did we use to represent the backbone in our model?

1

What is the difference between apparatus and procedure?

2

Why do we need an 'Aim' in our report?

3

Agree on one answer before writing.

4

Write one clear response.

Activity challenge

Group task:

1

Students brainstorm in pairs and list all the scientific experime...

2

Students copy the report structure into their notebooks and label...

3

Students participate in a whole-class exercise to verbally summar...

4

Write one clear response.

Exit ticket

Answer: How does writing a report help you remember the experiment?

1

Use one complete sentence.

2

Hand in or read your answer aloud.

3

Write one clear response.

4

Write one clear response.
