

3.4 Energy Resources in the Environment / Final Review

Integrated Science

Recalls and identifies key experiments conducted during Term 1.

Learning goal

Recalls and identifies key experiments conducted during Term 1.

Lesson focus: 3.4 Energy Resources in the Environment / Final Review

Looking Back at Our Experiments

Reviewing the Muscular-Skeletal model.

Recalling the Electricity and Magnetism circuit.

Remembering the Energy Resources (biogas/solar) project.

Identifying materials used.

How to Write a Science Report

Title and Aim (What and Why).

Apparatus/Materials (The tools).

Procedure (The steps).

Results and Conclusion (What happened and What it means).

Writing the Summary: A Demonstration

Selecting key details.

Using scientific vocabulary (conductor, insulator, circuit).

Summarizing the observation.

Group Work: Compiling the Term 1 Report

Collaborative writing.

Focusing on accuracy of facts.

Including diagrams where necessary.

Neat presentation.

Sharing Our Scientific Findings

Presenting the summary to the class.

Peer feedback on report structure.

Final reflections on Term 1 Science.

Check your understanding

What materials did we use to represent the backbone in our model?

What is the difference between apparatus and procedure?

Why do we need an 'Aim' in our report?

Why do we use words like 'attracted' instead of 'picked up'?

Write one answer clearly in your notebook.
