

## 4.0 Patterns and Sequences (Final Review)

OPENING VISUAL

What is a subset?

Think alone

Pair talk

Share one idea

## Today's mission

**Goal: I can apply all Term 1 math ideas (Sets, Whole Numbers**

### 1 Learn

**Use: Setting Up Our Math Market, Mapping the Market Data**

### 2 Practise

**Show: answer with one reason or example.**

### 3 Show

**Routine: listen, talk, try, explain.**

### 4 Reflect

**Explain in your own words.**

## Starter: think first

1

**THINK****What is a subset?**

30 seconds

2

**PAIR****compare your first  
answer with a partner.**

with partner

3

**SHARE****connect your answer  
to Setting Up Our Math  
Market.**

whole class

# Setting Up Our Math Market

## CONTENT MAP

### Concrete Stage: Organizing market items into

Use stones to  
represent  
customers

Group local  
items into Sets

Identify  
subsets within  
the market

# Mapping the Market Data

## MODEL MAP

### Worked example

Draw a Venn  
diagram of the  
inventory

Identify the  
rule of the  
sequence

Create a price  
sequence for  
items

## Try it together

### PRACTICE FLOW

### Answer with evidence

?

How many items are in  
our Universal Set?

---

answer + reason

?

Can an item belong to  
two sets at once?

---

answer + reason

?

Where do we put items  
that are both cheap and  
useful?

---

answer + reason

Use evidence from the lesson, not guessing.

# Activity challenge

## GROUP INFOGRAPHIC

### Challenge

Work in groups  
of five to sort  
physical

Individual  
learners solve  
multi-digit

Draw Venn  
diagrams on  
paper to  
represent their

Share-out: explain one result, then improve it.

## Exit ticket

### EXIT TICKET

**Answer: How does math help a market seller in Uganda?**

---

---

---

Use one complete sentence.

Hand in or read your answer aloud.
