

The Human Body: Muscular-Skeletal System

What do you feel when you touch your shin?

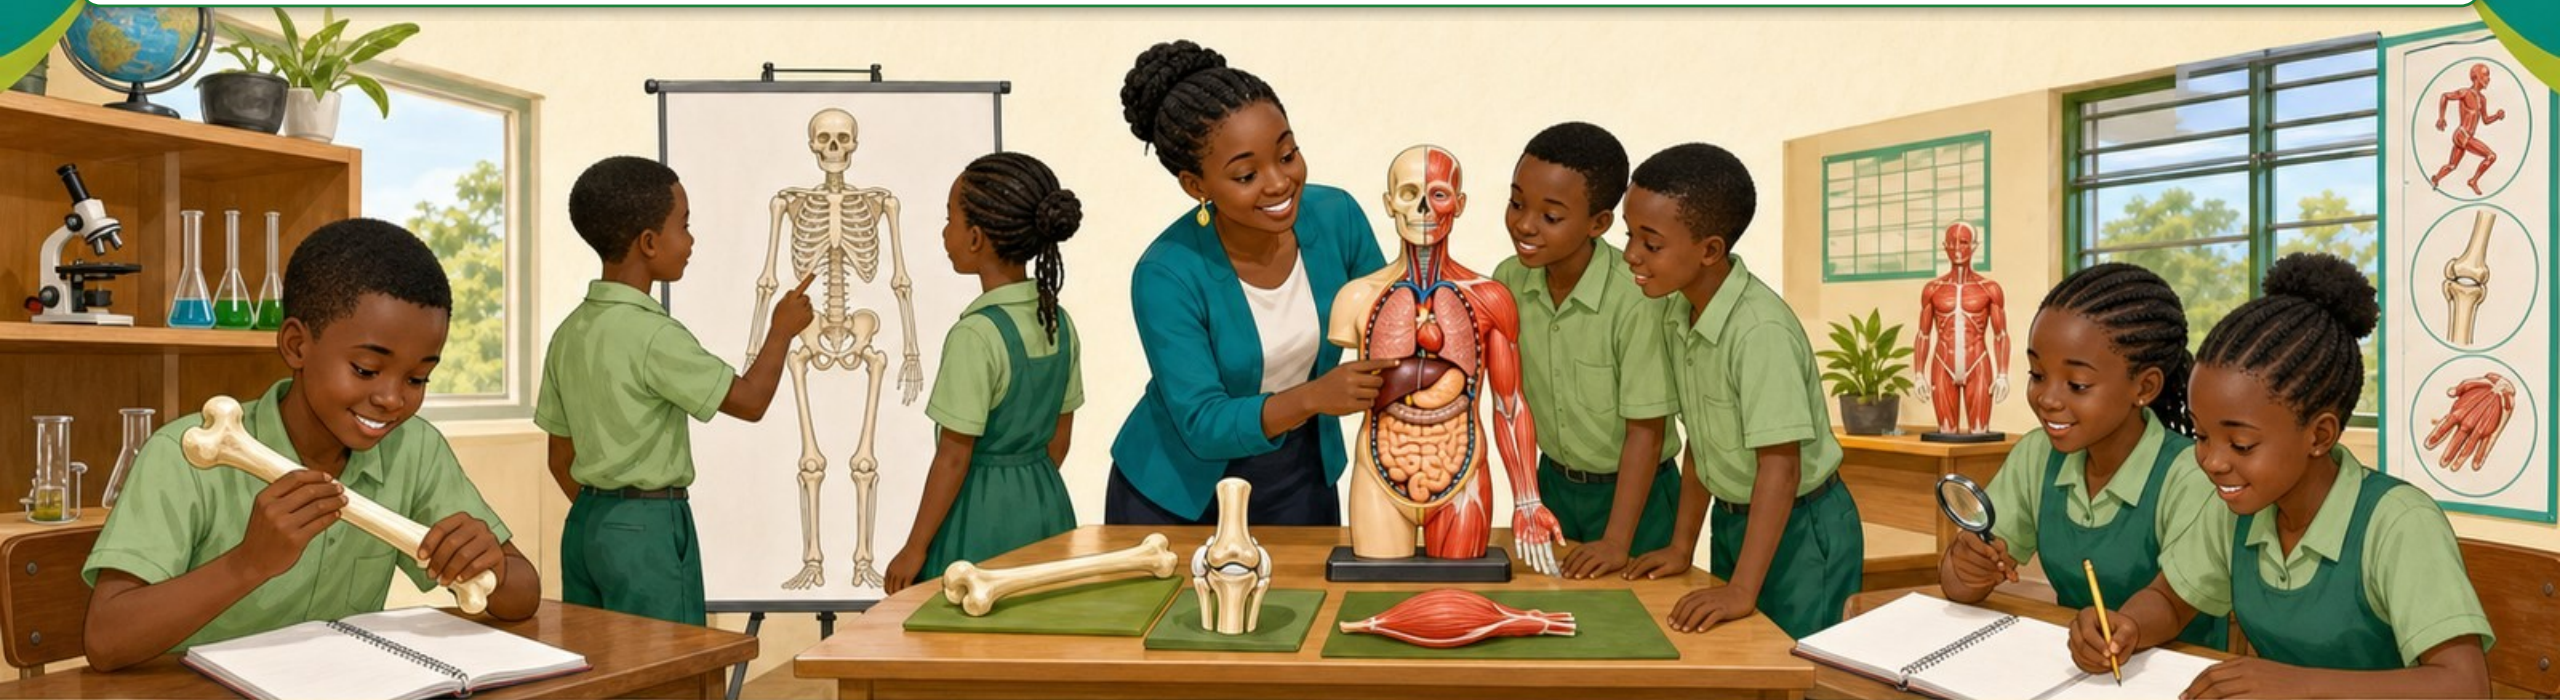

Think alone

Pair talk

Share one idea

Point to evidence

Today's mission

I can identify and name the main components of the

Why Do We Have a Shape?,
Exploring the Skeleton

answer with one reason or example

listen, talk, try, explain

Starter: think first

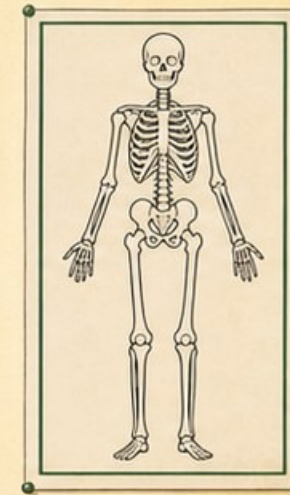

What do you feel when you touch your shin?

compare your first answer with a partner

connect your answer to Why Do We Have a Shape?

Why Do We Have a Shape?

Prior knowledge activation:
Discussing why the body

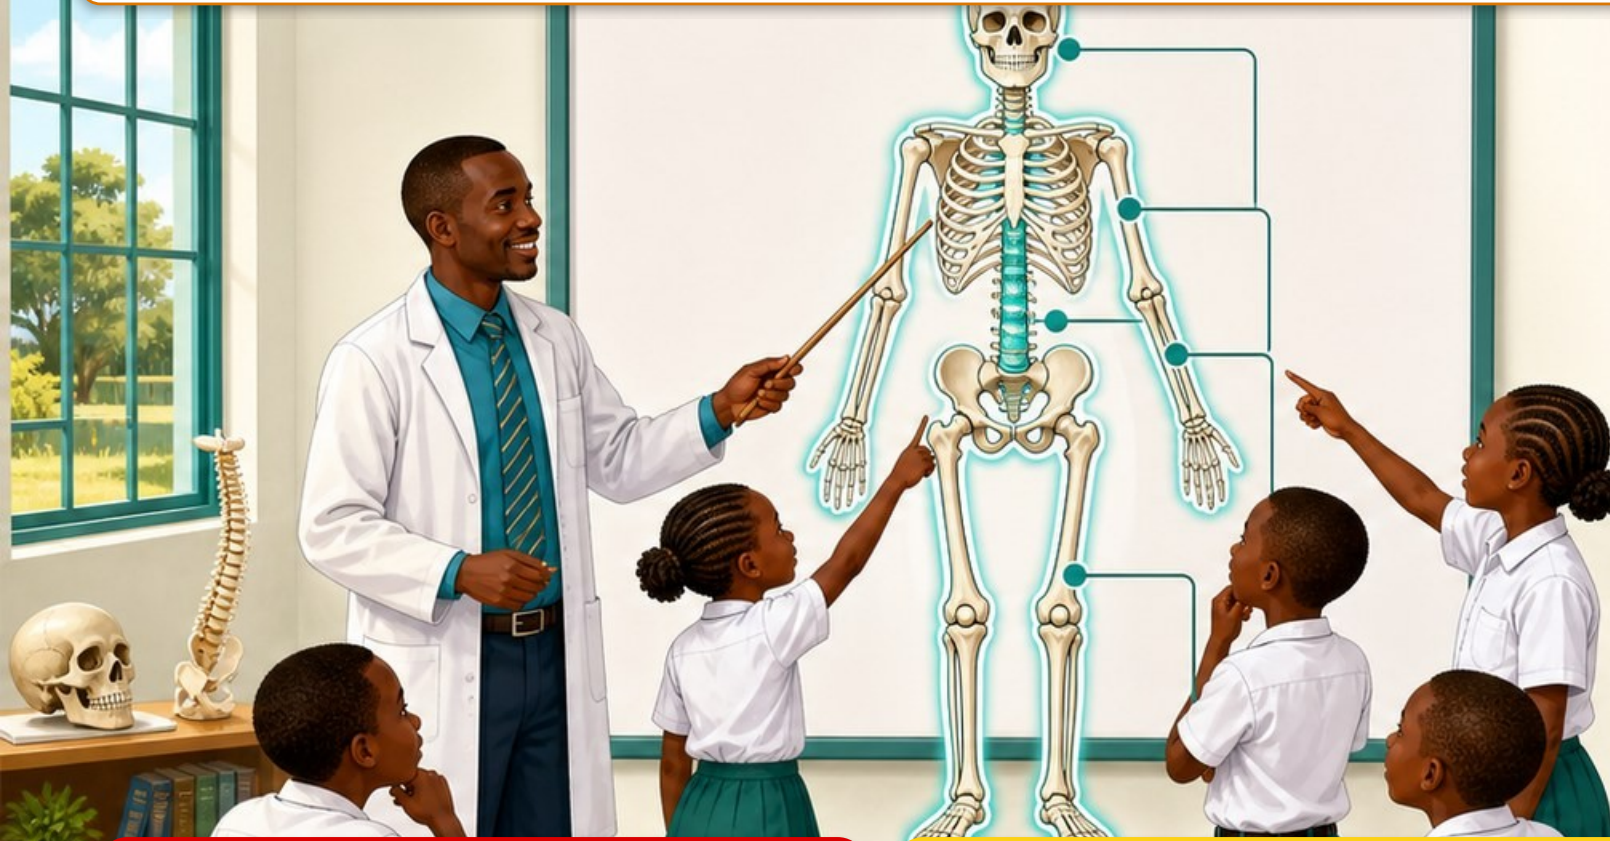

The body has a firm framework

This framework allows us to stand
and move

Without it, we would be like a heap of
cloth

Exploring the Skeleton

THE SKELETON

A framework of bones in the body

Share evidence

Try it together

Answer with evidence:

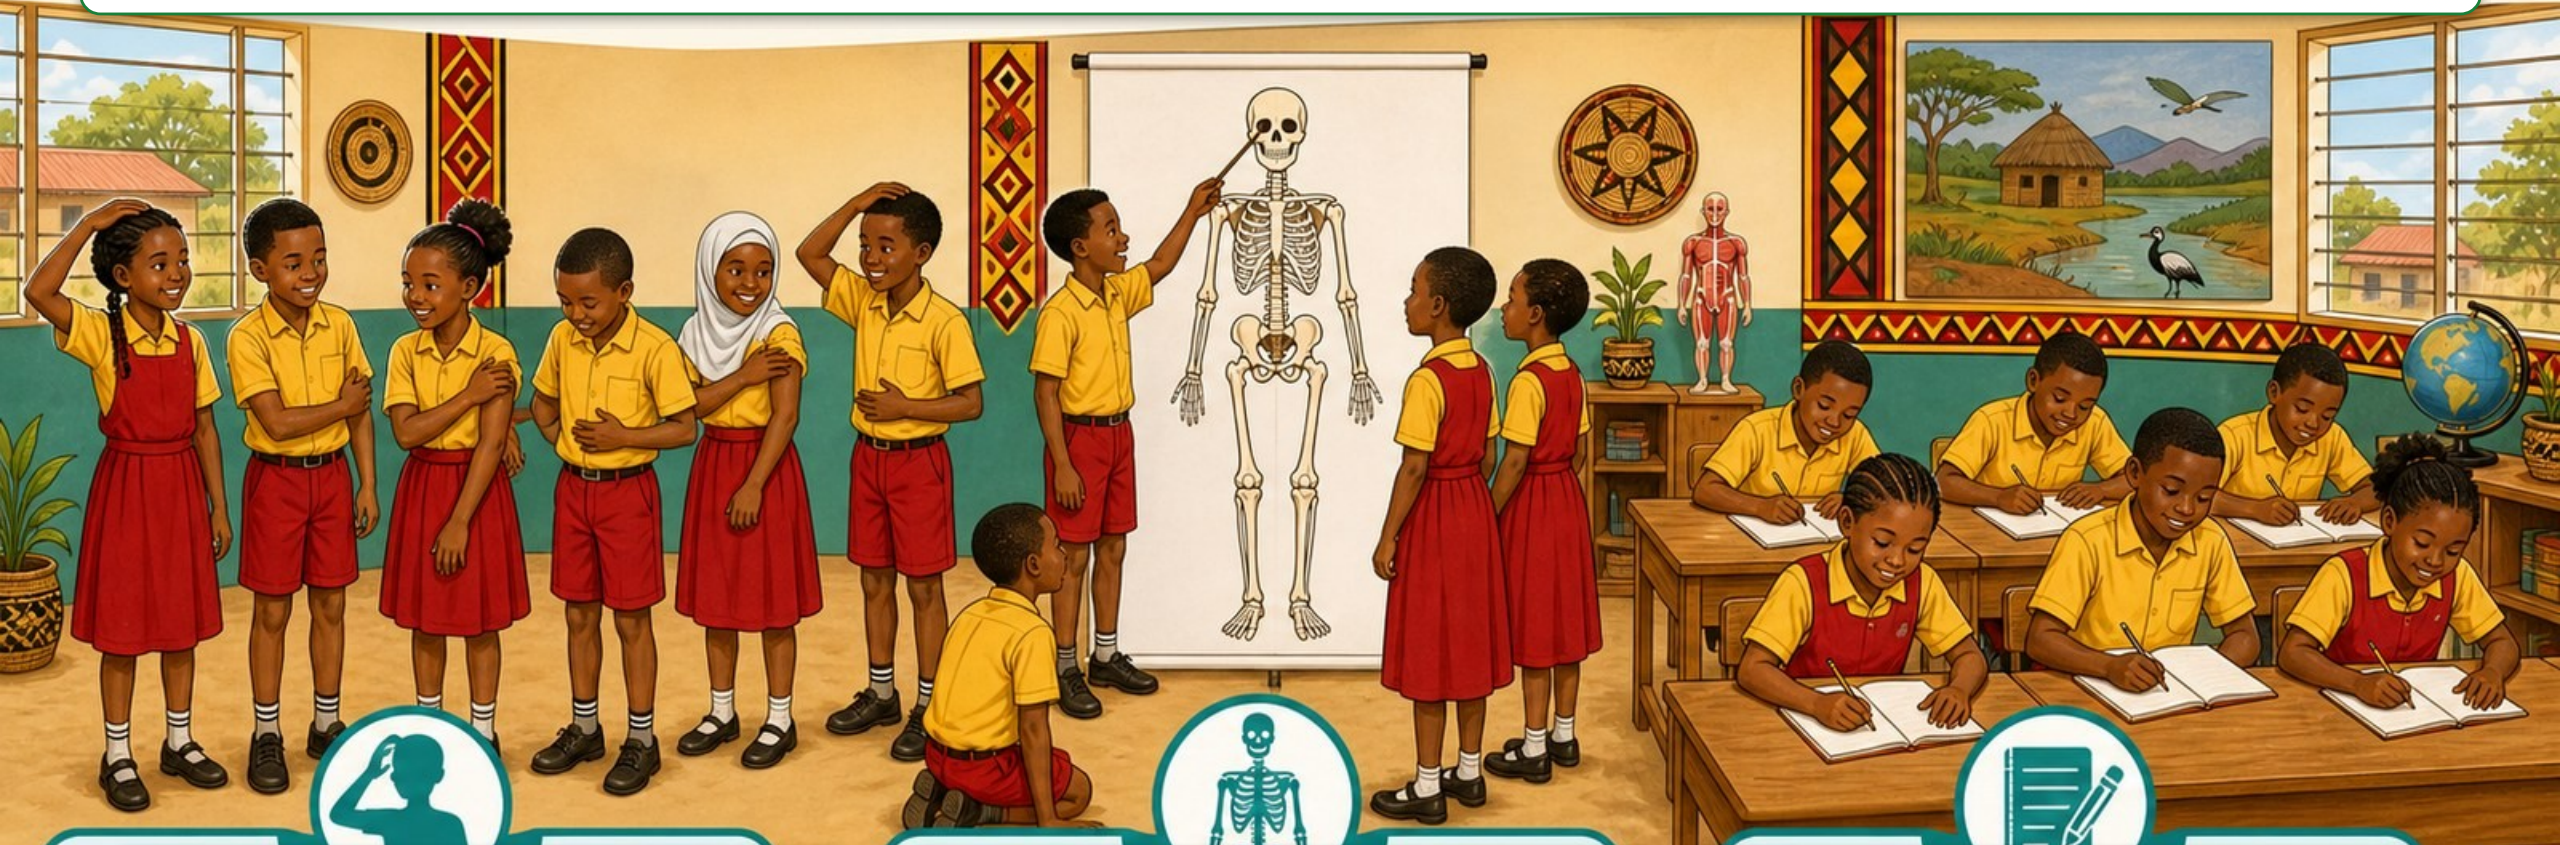

Why can't a piece of cloth stand up on its own?

What is the name of the bone protecting the brain?

Where are the longest bones found in the skeleton?

Activity challenge

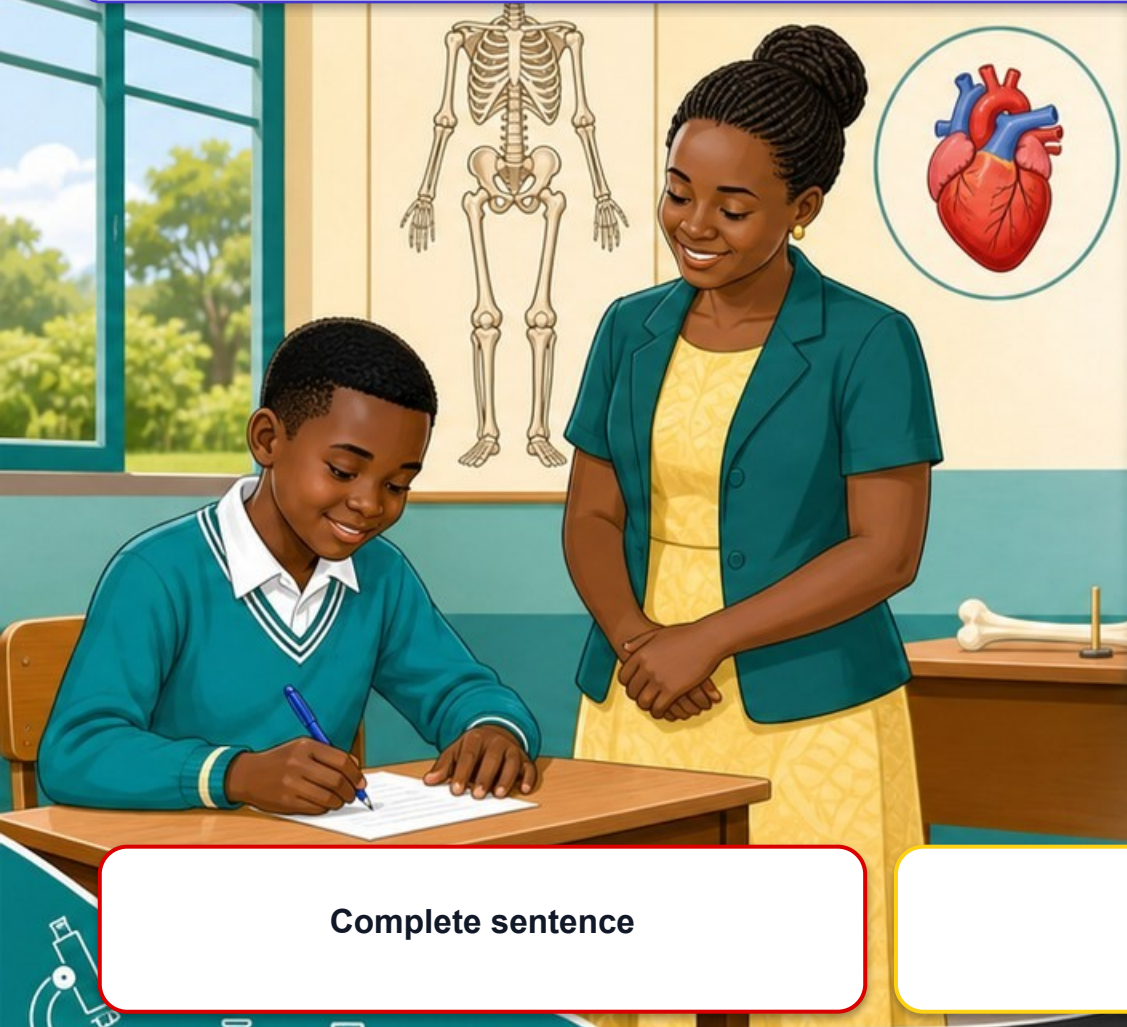

Touch various parts of their bodies (head, arm, ribs) to identify

In groups, observe the skeleton chart and point out the skull

Write the definitions of bones, muscles, and joints in their

Exit ticket

Is the heart part of the muscular-skeletal system?

Use one complete sentence

Hand in or read your answer aloud
