

4.0 Patterns and Sequences (Final Review)

What is a subset?

Think alone

Pair talk

Share one idea

Point to evidence

Today's mission

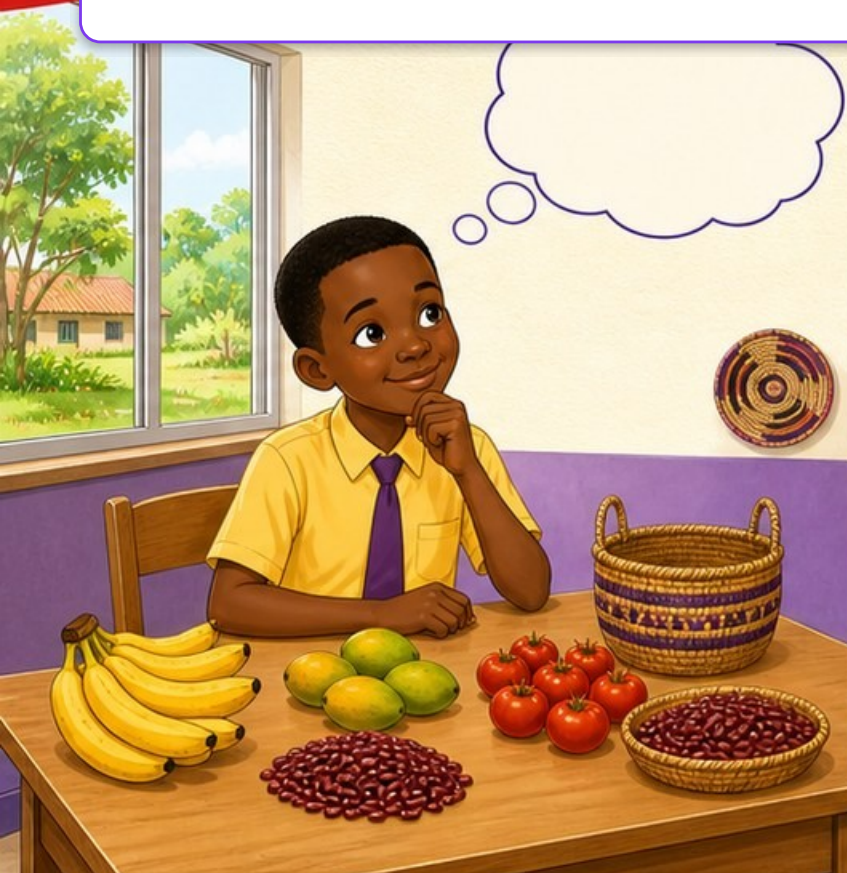

I can apply all Term 1 math ideas
(Sets, Whole

Setting Up Our Math Market,
Mapping the Market Data

answer with one reason or example

listen, talk, try, explain

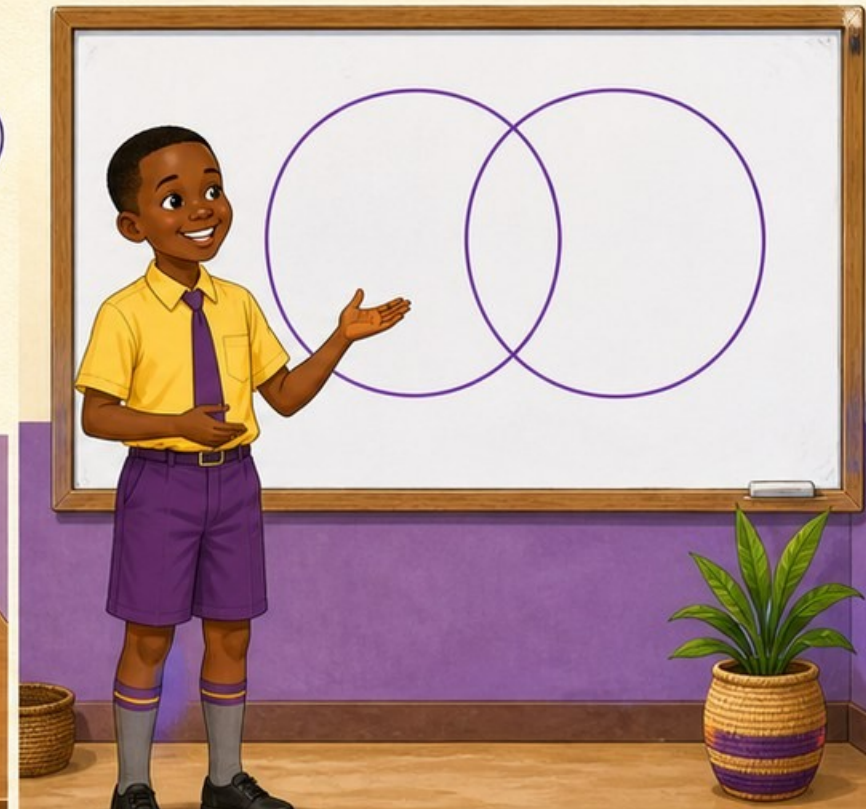

Starter: think first

What is a subset?

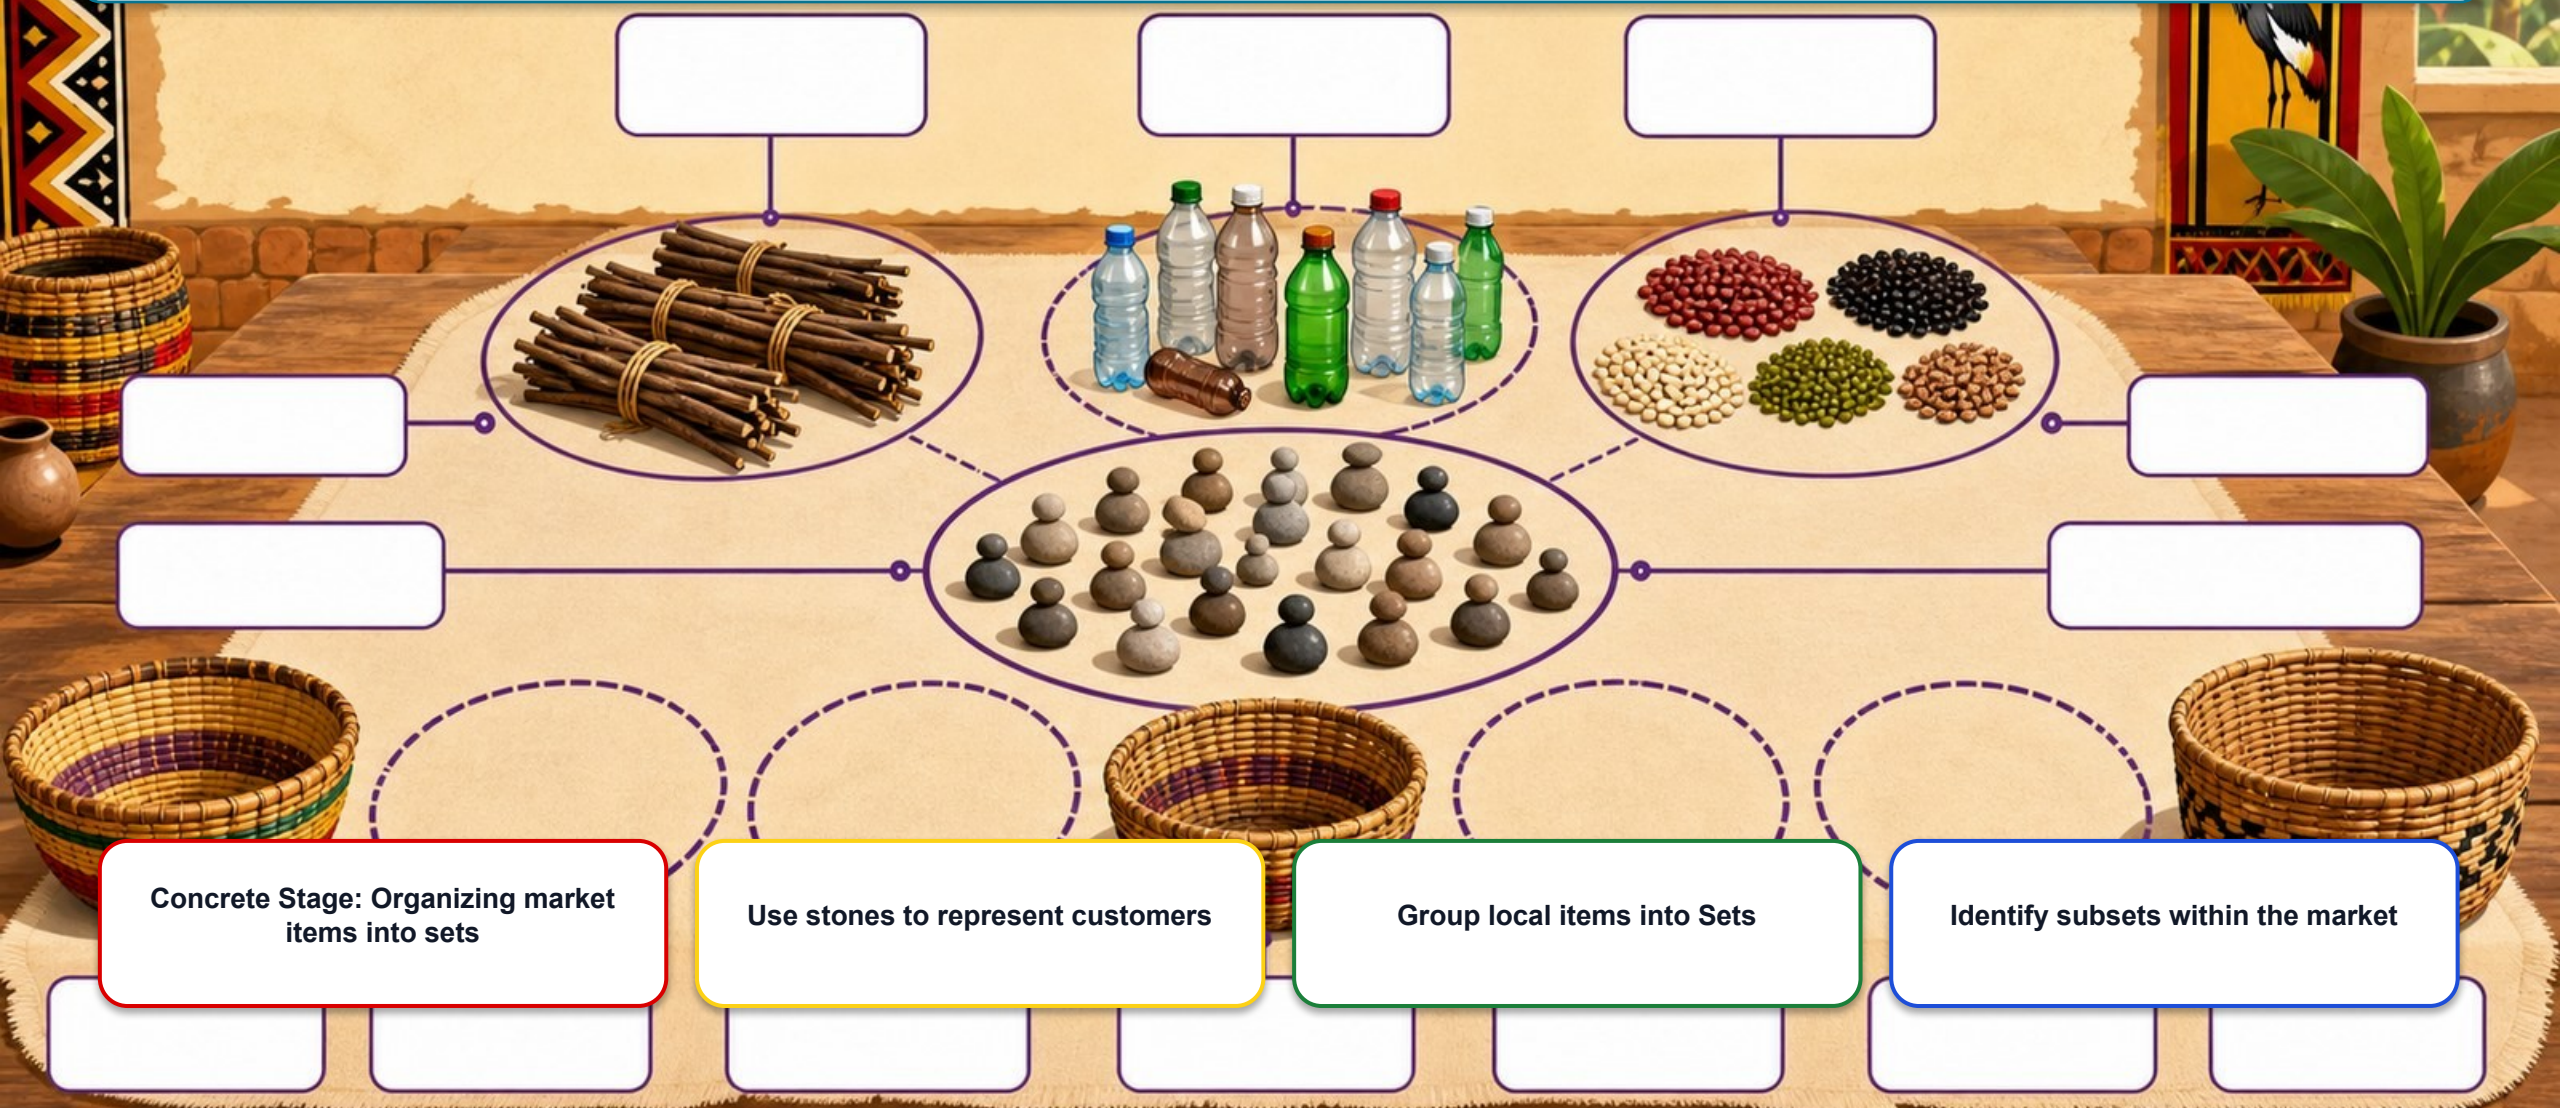

compare your first answer with a partner

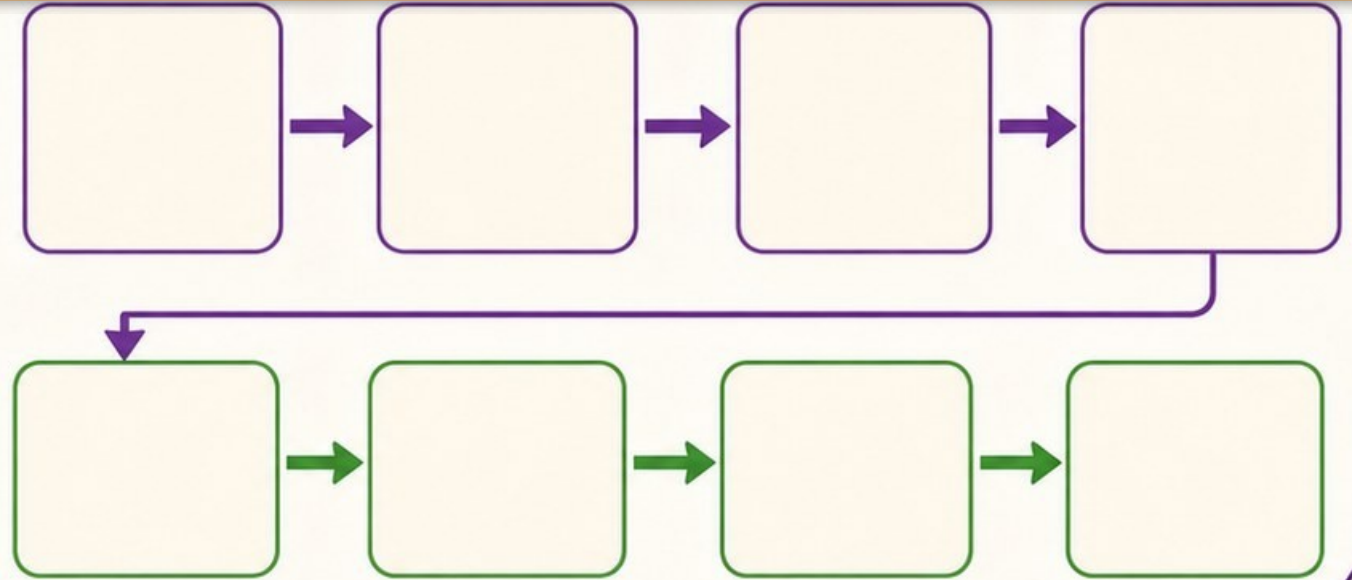

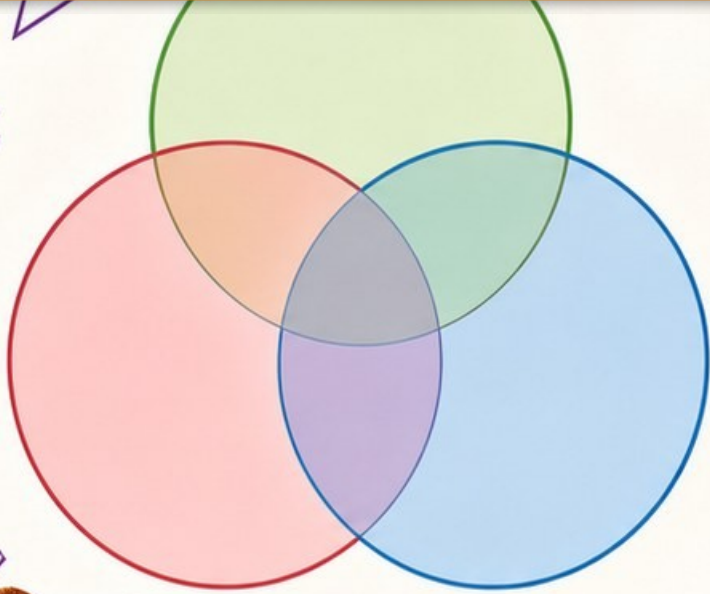

connect your answer to Setting Up Our Math Market

Setting Up Our Math Market

Mapping the Market Data

Draw a Venn diagram of the inventory

Create a price sequence for items

Identify the rule of the sequence

Try it together

Answer with evidence:

How many items are in our Universal Set?

Can an item belong to two sets at once?

Where do we put items that are both cheap and useful?

Activity challenge

Work in groups of five to sort physical objects (stones, sticks)

Draw Venn diagrams on paper to represent their sorted sets and

Individual learners solve multi-digit multiplication and addition

Exit ticket

How does math help a market seller in Uganda?

Use one complete sentence

Hand in or read your answer aloud

Complete sentence

Use a key word

Read aloud or hand in
